

Bunk Bed Guardrail Illustration

Non-Continuous (Open) Guardrail Bed Style

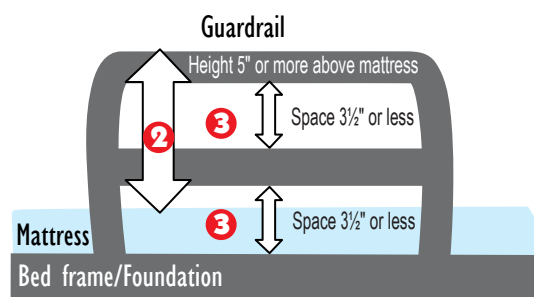

Continuous (Connected) Guardrail Bed Style

Note: Guardrail requirements apply to both sides of the bed when the bed is not secured against a wall.

- 1 End structure at the head of the bed
- 2 Guardrail height must be 5 inches or more above the mattress
- 3 Vertical spacing between rails and between the lowest rail and the mattress foundation or bed frame may not exceed 3½ inches

- 4 End structure at the foot of the bed
- 5 Ladder
- 6 An opening between the guardrail and the end structure at the head of the bed must be 15 inches or less
- 7 An opening between a guardrail and an end structure at the foot of the bed is based on the occupant's age (see chart below for restrictions):

AGE*	OPENING
6 years old	No more than 22 inches wide
7 years old	No more than 23 inches wide
8 years old	No more than 24 inches wide
over 8 years old	No more than 25 inches wide

* Children less than 6 years old should not use the upper bed of bunk beds. Openings must be 22 inches or less to allow use by any age group 6 years and older. Beds designed for a younger age group may be used by older campers and staff.
